PROFESSIONAL SUMMERY

Motivated undergraduate pursuing a BSc IT General Degree at Rajarata University of Sri Lanka with a strong foundation in software development, networking, database management, intelligent systems, and information security. Possesses hands-on knowledge in programming, web technologies, network design, VLAN configuration, database systems, and UI/UX design through academic and personal projects. Demonstrates strong analytical, communication, and teamwork skills, with the ability to adapt quickly to new technologies and work environments.

EDUCATION

Rajarata University of Sri Lanka

BSc. IT General Degree

2023- Present

KG/MW Badhuriya Central College

G.C.E. Advanced Level (A/L) - Technology Stream

2017-2020

PROJECTS

Chatbot for Academic Advising (Final Year Project)

- Group Project - AI Chatbot System
- Developed an academic advising chatbot to assist university students with academic-related queries. The system provides information such as subject combinations, GPA requirements, scholarships, and degree structures using structured data from the university handbook.

Technologies: Python, NLP, Chatbot Development, Rule-based AI / ML Concepts

Lost and Found Mobile Application

- Group Project - Mobile Application Development
- Developed a mobile application to report, search, and manage lost and found items within a campus environment. Implemented features such as user authentication, item posting, search functionality, and user communication between finder and owner.

Technologies: Mobile App Development, Database Management, User Authentication, UI Design

Emotion Detection Using AI

- Group Project - Artificial Intelligence / Machine Learning
- Developed an AI-based emotion detection system using neural network techniques to classify text-based student messages into emotional categories. Performed data preprocessing, model training, and evaluation.

Technologies: Python, Machine Learning, Neural Networks, NLP

Cisco Networking Project

- Individual Project – Network Design & Simulation

- Designed and simulated a computer network using Cisco Packet Tracer. Implemented VLAN configuration, DHCP setup, and basic network structuring to ensure efficient and secure communication between different network segments.

Technologies: Cisco Packet Tracer, Networking Concepts, VLAN, DHCP

Fungal Growth Detection Using Image Processing

- Group Project– Image Processing System
- Developed an image processing system to analyze fungal growth on bread samples over time. Implemented preprocessing, segmentation, edge detection (Canny), morphological operations, and growth analysis techniques.

Technologies: Python, Image Processing, OpenCV, Canny Edge Detection, Morphological Operations

TECHNICAL SKILLS

Programming & Scripting: Python, Java, C, HTML, CSS, JavaScript, SQL

Networking & System Configuration: Cisco Packet Tracer, VLAN Configuration, DHCP Configuration, Network Design, Firewall & Access Control Concepts

Artificial Intelligence & Machine Learning: Neural Networks, Emotion Detection, NLP Concepts, Chatbot Development, Intelligent Systems

Database & Backend Technologies: MySQL, Database Management Systems (DBMS)

Web & Mobile Development: Web Development, Responsive Web Design, Mobile Application Development, UI/UX Design

Image Processing & Embedded Systems: OpenCV, Image Processing Techniques, Arduino, Ultrasonic Sensors, IR Sensors, RTC Module, DFPlayer Mini

Tools & Technologies: GitHub, Figma, Microsoft Office, Cisco Packet Tracer, Visual Studio Code

Soft Skills: Problem Solving, Teamwork, Communication, Analytical Thinking, Adaptability

CERTIFICATES

Google AI Essentials | Coursera

Python Essentials 1 | Cisco Networking Academy

BITCODE Coding Competition | Rajarata University of Sri Lanka

Agile workshop participation | Rajarata University of Sri Lanka

LANGUAGES

Tamil - Native

English - Professional

Sinhala - Working Knowledge
